

## **Outside the Continental USA Customized Services:**

VRpatients elevates the standard of virtual reality simulation with a suite of bespoke services, meticulously designed to align with our clients' specific educational and operational needs. At the forefront, our software expertise enables the creation of authentic and medically accurate scenarios, each subjected to extensive testing to ensure a seamless content flow. Our Subject Matter Experts (SMEs) bring their wealth of knowledge to provide unparalleled support in content development.

The initiation of our services begins with a comprehensive consultative review, allowing for a tailored selection and pricing of services to precisely meet each client's objectives. This bespoke approach affords VRpatients' clients a streamlined "quick start" integration, facilitating immediate utilization and a customized embedding of VRpatients into their curriculum. Through our consultative process, we ensure a seamless transition into immersive simulation, enhancing educational outcomes and elevating the learning experience for all users.

This comprehensive suite of services is not just an add-on but a core part of the VRpatients offering, ensuring that every client can fully leverage the potential of virtual reality simulations in their educational programs.

## **Remote Simulation Tech- \$2500/Scenario includes Medical Validation**

Access the brilliance of VRpatients' software craftsmanship with our Remote Simulation Tech service. This premier offering includes dedicated scenario construction by a VRpatients software experts ensuring that each simulation is not just a learning experience but a masterpiece of digital innovation. This service empowers institutions to transcend traditional simulation boundaries, making advanced clinical training accessible anytime, anywhere.

## **Traditional Onboarding: \$4000/Annually**

Virtual Training Onboarding includes 10 hours of annual virtual coaching coupled with a rich selection of self-directed learning resources. This unique blend of guided training coupled with self-directed learning assignments and material offers the convenience of learning at your pace. With instructional sheets, video links, and supportive materials accessible 24/7.

## **Personalized Onboarding both with Virtual and with 3-day Onsite Train the Trainer Instructional Course-\$8000 + Current Travel Rates**

Elevate your VRpatients experience with our Personalized Onboarding program. Distinguishable from our standard onboarding, this exclusive service offers eight annual one-hour sessions with an onboarding specialist combined with the benefit of Onsite Training. Designed for depth and effectiveness, these sessions ensure that every aspect of the VRpatients platform is tailored to meet the unique needs of your institution, providing a solid foundation for immersive learning.

## **Subject Matter Expert (SME) Collaboration- \$3800/Annually**

Unlock the potential of virtual reality simulation with our Subject Matter Expert (SME) Coaching. This personalized service extends beyond conventional support, offering expert guidance in implementation, integration, research, and academic enhancements. Our SMEs work closely with your team to tailor VRpatients' powerful tools to your curriculum, fostering innovation and excellence in clinical education.

## **Curriculum Integration- \$1000/4 Hrs.**

Our Curriculum Integration service offers a strategic approach to embedding virtual reality simulations into your educational framework. This service provides expert guidance on aligning VRpatients scenarios with your curriculum, ensuring that each simulation enhances learning outcomes and meets accreditation standards. It's an essential service for institutions aiming to seamlessly integrate cutting-edge technology with educational excellence.

## **Quick Start Scenario Packs- \$12,500/5 Scenarios**

Fast-track your simulation readiness with our Quick Start Scenarios. Available in packs of five, this service involves the meticulous construction, creation, and validation of scenarios, crafted to meet the specific needs of your institution. These tailor-made simulations are designed to provide immediate value, offering a quick and effective way to introduce advanced clinical training into your curriculum.
